Lock housing with profile cylinder for swing height restrictor HBS 50/54

Lock housing with profile cylinder for the main post of the Mannus HBS 50 and HBS 54 swing height restrictors.

KEY FACTS

Locking Mechanism	Euro profile half cylinder
Locking	Keyed Alike
Item no.	103614-2

DESCRIPTION

The lock housing replaces padlock locking: a locking bolt engages automatically when the beam is swung into one of the 90° positions.

The lock housing has a 30/10 profile half-cylinder, keyed alike, and a removable wall for a second profile cylinder, for example if two different locking systems need to open the same beam. The key can be removed in both the open and closed positions. If you want the key to be removable only in the closed position, a forced-locking insert is available.
