Mounting cage with anchors for main post height restrictor HBS 50/54/100/110

The mounting cage is cast into a new foundation and holds four hook anchors in the correct position, so the main post can then be bolted onto the protruding threads.

KEY FACTS

Accessory Type	Ground anchor
Material	Steel
Hole spacing (c/c)	210 x 210 mm
Item no.	104818
Weight	2.3 kg

DESCRIPTION

It is used when the height restrictor is to stand on a cast foundation rather than being bolted into existing concrete.

The hole pattern is 210 × 210 mm and fits the 250 × 250 mm base plate on the main post of the Mannus HBS 50, HBS 54, HBS 100 and HBS 110. The cage is made of steel and weighs approx. 2.3 kg. The recommended foundation for the main post is 600 × 600 × 800 mm as per the foundation plan.
