Support post for swing-arm height restrictor HBS 50/54

The support post holds up the free end of the boom on the Mannus HBS 50 and HBS 54 swing-arm height restrictors.

KEY FACTS

Model	HBS 50, HBS 54
Finish	Hot-Dip Galvanized / Galvanized, Hot-dip galvanized and painted
Mounting Hardware	Anchored, Cast-in
Post Dimensions	70 x 40 x 3 mm
Weight	20 kg

DESCRIPTION

It is made from 70 × 40 × 3 mm rectangular tube and is height-adjustable by +250/−0 mm, so that it matches the set height of the boom.

Choose the model to suit the height restrictor (HBS 50 with an overall height of 3.0 m or HBS 54 with an overall height of 4.0 m), finish and mounting. The cast-in post is set 300 mm deep in a 400 × 400 × 600 mm foundation. The bolt-down post has a 200 × 200 mm base plate with a 160 × 160 mm hole pattern and Ø 13 mm holes. Image 1 shows the post with a locking bar, which is a separate option.
