BARREL ROOF SECURE "L" SHELTER FOR BIKES AND MOTOR BIKES

New products 2025

TECHNICAL SPECIFICATIONS

> Dimensions Initial unit: width 2520 x height 2640 x depth 2830 mm
> Structure: 80 x 80 mm galvanised steel posts
> Roof: 60 x 40 mm steel cross-members and aluminium gutters, painted in our colours, 10 mm thick anti-UV-treated polycarbonate honeycomb canopy. Anti-intrusion roof reinforcements
> Cladding: 1.2 mm thick decorative metal sheet or Ø 5 mm rectangular wire mesh welded to a galvanised and painted steel angle frame
> Double door: top section in decorative metal sheet or Ø 5 mm square mesh, bottom section in 1.5 mm thick metal sheet. Unlocking options: choose from a European lock and key, a mechanical digital code, or a smart connected lock for seamless access. Doors open from the inside without keys. Doors held in open and closed position by a jack
> Extension module, width 2520 mm

Ref. 529091 + 529093

INSTALLATION RECOMMENDATIONS

> On base plates galvanised 200 x 200 mm, height-adjustable feet, expansion plugs supplied

OPTIONS

> LED lighting: assembled on an aluminium tube. 220V power supply, to be connected by a professional (circuit breaker not supplied)
> Connected lock: allows smartphone or badge access (replaces European lock/key). Easy to install and requires no electrical connection
